

SMART3DExport

**WYSIWYG export
of
Combined States
to 2D PDF**

SMART – FAST – ROBUST

Integrated in

creo® parametric

You like to ...

- ... bring forward your Model-Based-Definition activities, but still need a 2D PDF
- ... save time spending on 2D drawings
- ... quickly print selected Combined states
- ... let Windchill automatically create 2D PDFs from your 3D models
- ... manage a large number of Combined States

SMART3DExport provides:

- WYSIWYG export of your Combined States from the 3D part or assembly to a multipage 2D PDF
- Full drawing format support.
- Automatic background 2D PDF generation support for Windchill Worker.
- Combined States Management including Grouping, Sorting, and Default settings.
