SMARTUpdate 9.0.0.0

What's new?

Speed up the check and update process

- **60% overall speed increase**
  - Checking and updating structures of assemblies
  - Large amount of checks
  - Check and Update in Batch mode

New Gate Keeping Mechanism

- **Avoid checking in in Windchill low quality parts**
- **Use the read only parameter SU_ERRORS**
- **The mechanism can be activated or deactivated via config**

- **Gather all available information about a model**
- **Save it into a database for further analyses**
- **Suitable for data mining on the overall model quality**
